

# IT IS AN URGENT TIME FOR ACUPUNCTURE, WHAT CAN PATIENTS DO TO HELP?

**[Click Here to Download a Copy](#)**

To ensure that your practitioner can continue to provide you with same level of expert care, it's time to update the Florida Acupuncture Practice Act.

- Every health care practitioner has a "Practice Act" (Laws) that describe what they are allowed to do.
- Many aspects of Acupuncture treatment have evolved that improve your Acupuncture physician's ability to treat and manage your health concerns.
- Periodically, the laws have to updated. Now it's time for Acupuncture physicians to update theirs.
- This is an expensive but necessary process that ensures Acupuncture physicians can continue helping patients while using all of their training and skills.
- Updating the laws ensures that insurance companies continue to provide health benefits that include safe and effective treatment options, like Acupuncture.
- Additional services like, Acupuncture Injection Therapies, Laser Acupuncture, ordering X-rays/MRI's and Clinical laboratory Testing (Labs) will continue to be available through Acupuncture physicians' offices.

Your financial support is vital and very much appreciated. 100% of your contribution will be used to help protect your access to the high-quality care that you receive in this Acupuncture physician's office.
